Made random little projects
Listen to music while doing all previous stuff

My website

Whoami?

Maldonado González Hilarión Guadalupe, a software engineer student.

Goals

I see myself in the future as a software architect recognized by the mainstream enterprises, with a team full of skillful team members and also a great hungry for improve myself. I am an honest person, really proactive and able to listen and speak to other team members with no problem at all.

Projects

- Rentacar is a platform that allows car renting, with a web page to provide admin interfaces to upload cars and mobile app to rent and deliver cars.

- CAP is a native mobile app for psychologist's support control.

- OrbitalHope is a web application that shows space debris around the earth, product of space apps's hackathon 2021.

- MoanaKee is a web page game that lets you move a tortoise who's looking for food but has to avoid ocean trash to stay alive.

- Edupaq is a website to manage classes, teachers can create and apply exams (google forms like), also appoint homework and record partial qualifications to every student (classroom like).

- MyMonitor is a website to see sensed data, shows a history and the last temp.
